

EO Approved Installer.

Grow your business
installing electric vehicle
charging stations.

eo

Join our journey, complete our approval programme today.

Take your career to a new level thanks to an industry-recognised certification.

We're looking for the world's best installers to join our journey and help the much-needed expansion of charging infrastructure around the world. As an EO Approved Installer, you'll take care of installing our charging stations for homes and commercial environments.

What's included:

- **Free technical training:** get access to our online training and get to grips with installing our products.
- **New leads and projects:** we'll refer you to projects and customer segments you might not have reached before.
- **Ongoing support:** You'll also be assigned to an EV expert within our company, who will make sure your needs and requests are met.
- **Join the community:** work with other EO International Partners across the world by joining our webinar series, sharing ideas and experiences.
- **Exclusive perks:** we'll provide you with seasonal promotions, giveaways and invite you to our exclusive events.
- **Approved installer status:** upon successful completion of our training, your company will be officially certified as an EO Approved Installer.

Ready to partner with us?

As an EO Approved Installer your career will be taken to a new level thanks to an industry-recognized certification, showing that you're keeping pace with the electric vehicle revolution. Start your journey here: www.eocharging.com/eo-approved-installer

We're here to help, every step of the way – simply get in touch with us to discuss your requirements.
